In the realm of energy transition, where efficiency, cost savings and quality reign supreme, stands OSC Energy – a beacon of excellence and innovation.

OSC Energy envisions providing innovative and reliable renewable energy solutions with end-to-end service excellence that drives long-term satisfaction for clients and sustainable outcomes for the planet.

As a 100% Australian-owned and operated entity, we are your trusted local mid-north coast solar energy installation experts for over 35 years. We understand that each customer's journey toward energy efficiency is as unique as their individual needs, thus, at the heart of our approach lies a commitment to delivering excellence.

Message from the CEO

Today, OSG Energy strives for better customer experience focused on lifting industry standards, dedicated to driving innovation and sustainability. Our focus spans from rural farming to the automotive and logistics industries.

I believe in shaping a sustainable future, and our vision is clear: to partner and collaborate with large corporate clients eager to transition into a renewable energy era. We are committed to providing customised, high-quality solutions that meet the unique needs of each client, ensuring a seamless transition to cleaner energy. Together, we can create a greener, more sustainable future for all.

Looking ahead, we plan to expand our services and technological capabilities, further enhancing our end-to-end solutions. Our goal is to lead the market with cutting-edge renewable energy technologies, ensuring our clients benefit from the latest innovations. We will continue to invest in our team and infrastructure to support large-scale projects and foster long-term partnerships. Our vision is to be the preferred renewable energy partner for businesses across Australia, helping them achieve their sustainability goals efficiently and effectively. We invite potential clients and partners to join us on this journey towards a more sustainable future.

Steve Donnelly

Steve Donnelly
CEO, OSG Energy

Our People

At OSG Energy, our team combines expertise and commitment to deliver outstanding results across Australia. Our skilled professionals, including full-time licensed employees and certified delivery partners, are equipped to handle projects in metropolitan, regional, and remote areas.

We have successfully executed over 2.5 megawatts of solar installations and numerous complex electrical projects. Accredited by the Clean Energy Council, our team ensures the highest standard of workmanship and materials, using only approved solar PV panels, inverters and products.

Our leadership team, based on the Central Coast of NSW, boasts over fifty years of combined delivery experience. They are visionaries with a diverse range of business acumen, including mergers and acquisitions, technology solutions, distribution optimization, and seamless deployment. With multiple industry certifications and licenses, our leadership ensures compliance and excellence in every project. Their unwavering commitment to innovation and efficiency guarantees that every project is executed to the highest standard, paving the way for your financial success through sound investments and strategic execution.

Steve Donnelly
CEO and Founder

Steven is the CEO of OSG Energy. With a background rooted in telecommunications and a journey from Telstra to founding MIRAIT Technologies Australia, a national construction company. Steve is well experienced in transformative industries, aiming to shape a sustainable future in the renewable energy era.

Dave Marsh
Chief Operating Officer

Dave joined OSG Energy as Chief Operating Officer since company inception. A 40-year veteran of the telecommunications industry, his previous experience includes several Vice President positions in key accounts requiring complex selling with large-scale deployment and managed service operations. Dave holds an Engineering Degree (Hons) with Diplomas in Management, Finance and Marketing.

Our Difference

Rapid Deployment & Proven Expertise

With over 35 years of exceptional service, OSG Energy combines rapid deployment capability with extensive experience and expertise. It has a proven track record in delivering high-quality solar and electrical projects, including over 2.5 megawatts of solar installations, successfully executing both small and large-scale projects.

End-to-End Personalised Service Excellence

OSG Energy provides a hassle-free experience by managing everything from permits to inspections and interconnection. Each project is overseen by a dedicated Project Manager who keeps clients informed and ensures seamless execution. Its team tailors each solar energy system to the unique needs of the customers, considering factors such as electricity consumption, building structure, and geographical location, crafting solutions that align perfectly with their energy needs.

Comprehensive Solutions & Strong Vendor Partnerships

OSG Energy provides a wide range of products and services combined with a professional design team that ensures all solutions not only maximizes energy savings but also capitalizes on every available opportunity for efficiency and sustainability. It has established robust relationships with leading manufacturers in the solar industry, offering high-quality products and exceptional customer support.

Local Presence & National Reach

As a 100% Australian-owned and operated company, OSG Energy combines its deep local roots on the Central Coast of NSW with an extensive reach throughout Australia. Through strategic regional partnerships, OSG Energy effectively covers metropolitan, regional, and remote areas, ensuring comprehensive service delivery and a deep understanding of local market needs while maintaining a national footprint.

Commitment to Quality & Safety

OSG Energy upholds the highest standards of quality and safety, with solar panels and inverters approved by the Clean Energy Council and backed by the best warranties in the industry. Its numerous licenses and accreditations, including strict compliance with Australian standards, reflect its dedication to excellence. Additionally, it prioritizes health and safety, implementing rigorous risk management practices to ensure the well-being of our team and clients.

“We source the highest quality products from industry leading manufacturers.”

Products

OSG Energy offers a comprehensive suite of solar energy products to meet the diverse needs of its customers. They have built strong relationships with leading manufacturers in the solar industry, ensuring they can provide high-quality products with exceptional customer support.

INVERTERS: OSG Energy offers a variety of inverters from industry-leading manufacturers like Fronius, Sungrow, and Solar Edge. Inverters are a critical component of a solar energy system, as they convert the direct current (DC) electricity produced by solar panels into usable alternating current (AC) electricity for your home or business.

PANELS: OSG Energy offers solar panels from a variety of manufacturers known for their performance and reliability, including Trina, Jinko, Solar Edge, and REC. Solar panels are responsible for capturing sunlight and converting it into DC electricity. OSG Energy can help you choose the right panels to meet your specific energy needs and budget.

BATTERIES: Solar batteries allow you to store excess solar energy generated during the day for use at night or during peak energy demand periods. OSG Energy offers batteries from Tesla, Sungrow, BYD, and Solar Edge, providing a variety of options to suit your needs.

OSG Energy operates from its Head Office on the Central Coast of NSW, with established regional partnerships throughout Australia. Our offices are strategically located: one in Laurieton, serving the entire Mid-North Coast of New South Wales, from Forster to Port Macquarie and surrounding areas; and the other in Toukley, serving Sydney, the Central Coast, Newcastle, and beyond.

Services

OSG Energy provides customised end-to-end renewable energy and electrical solutions for all aspects of renewable energy and electrical requirements from standard to the most complex, delivering quality outcomes and a proven outstanding level of service.

Starting with an in-depth consultation, we design tailored systems for commercial and residential projects. Our Project Managers oversee every installation aspect, ensuring seamless execution and keeping you informed. We provide ongoing maintenance and support for long-term reliability. By handling everything from initial design to final maintenance, OSG Energy ensures a hassle-free experience and exceptional service.

COMMERCIAL AND INDUSTRIAL SOLUTIONS: We design and install renewable energy systems tailored to the unique needs of commercial properties, ensuring cost savings and sustainability.

RESIDENTIAL SOLAR SOLUTIONS: Our team provides customized solar solutions for homes, maximizing energy efficiency and reducing electricity bills.

BESS: As a certified installer, we offer a solar-plus-battery solution that allows you to store and use solar energy anytime, ensuring 24/7 clean energy.

SPECIALISED ELECTRICAL WORKS: Our fully licensed electricians handle all types of electrical projects and design through to installation, commissioning, and routine maintenance ensuring quality and safety.

EV CHARGER INSTALLATION: We design and install efficient EV charging infrastructure for commercial properties, supporting sustainability and attracting eco-conscious customers.

DESIGN CONSULTANCY: Offering expert advice and planning for renewable energy and electrical projects to ensure optimal design and implementation.

PROJECT/PROGRAM MANAGEMENT (PMO): Providing comprehensive management services for projects and programs, ensuring they are completed on time, within budget, and to the highest standards.

INDUSTRIAL SOLAR, BATTERY, AND ELECTRICAL: Delivering tailored energy solutions for industrial applications, enhancing efficiency and reducing operational costs.

GOVERNMENT SOLAR & BATTERY INFRASTRUCTURE PROGRAMS: Partnering with government entities to implement large-scale solar and battery projects, contributing to public sustainability goals.

LEVEL 2 ASP WORK: Specialising in large-scale meter changeovers and other advanced service provider tasks to ensure reliable and efficient energy distribution.

PREVENTATIVE MAINTENANCE PROGRAMS: Offering regular maintenance services to prevent issues and ensure the long-term performance of energy systems.

GENERAL ELECTRICAL PROJECTS: Handling a wide range of electrical work for various applications, providing reliable and high-quality service.

ENERGY BAY

Strategic Partnership with Energy Bay

OSG Energy proudly partners with Energy Bay to drive innovative solar energy projects across Australia. This collaboration enhances our capabilities and reinforces our commitment to sustainability.

Energy Bay has renewable energy delivery contracts with Stockland and ESR Australia. Energy Bay's Stockland project includes installing over 10 MW of solar panels across various Stockland retail centers, generating significant energy savings and reducing carbon emissions. Similarly, their ESR Australia portfolio includes installing a 5 MW solar system at ESR Australia's logistics properties, aiming to significantly reduce energy costs and carbon footprint.

Working with clients such as Energy Bay, OSG Energy is providing cutting-edge solar solutions, supporting Australia's transition to a sustainable energy era.
